

1. A domestic source of neutron beams for research is essential to Canada's future in science and technology.
2. CINS strongly supports the initiative of the government of Saskatchewan for the construction of a research reactor in Saskatoon as a source of neutron beams.
3. CINS urges our partners, without delay, to fund a conceptual engineering design and costing study, as well as other components of a diligent business case, for federal-provincial cooperation to implement the proposal for a neutron-beam research reactor at the University of Saskatchewan.

Passed unanimously at the CINS Annual General Meeting,
Saskatoon, October 16, 2010
